Vericare

A smart care platform that supports senior living and care providers in achieving improved safety, personalized care and operational efficiency.

How Will Vericare Help Your Business?

Client Safety Management

- Increasing client safety without compromising client independence and privacy.

- Minimizing risk of human error.

- Early identification and intervention of a risk situation.

Personalized Client Care

- Unbiased evidence to inform best care decisions.

- Extending client independence through better understanding of their care needs.

- Identification of changes to health and Activities of Daily Living (ADL) for early prevention.
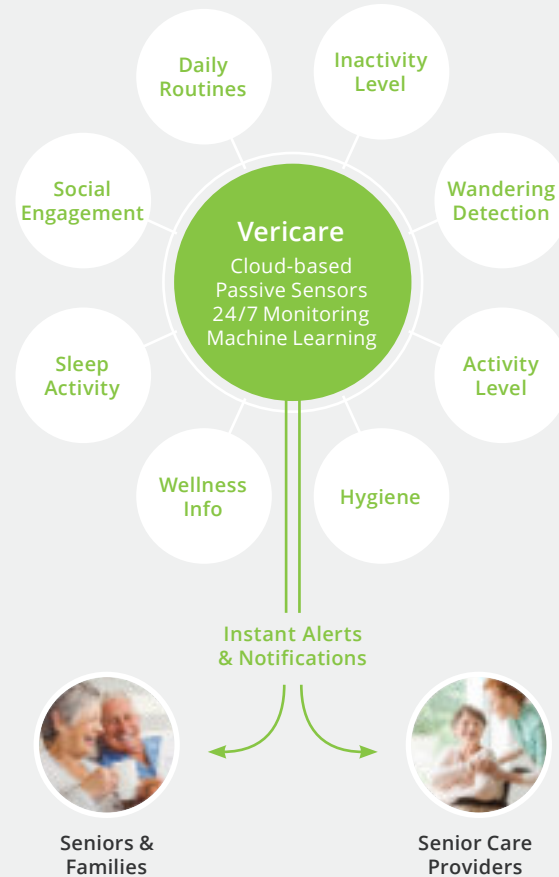

Operational Efficiency

- Automating Good Morning and daily check-ins.

- Dashboard Tool information enables allocation of resources to high priority areas.

How It Works

Discrete passive sensors track and monitor *Activities of Daily Living* (ADL) in real time. No cameras, no mics.

Using proprietary algorithms and pattern recognition technology of the ADL data, Vericare will notify family members and caregivers of potential safety or health concerns through text-based alerts.

What Users Say

"The system is not intrusive, it provides an additional layer that makes me feel safer."

Vericare User

"We are able to know the safety status of our clients at any time, without them feeling invaded. This gives us peace of mind that we are able to get to them sooner should they experience a safety situation."

Independent Living Provider

"I am beyond thrilled. The system informed the staff when I did not get out of bed during my regular time and they checked on me."
